SUMMARY

B.Tech Information Technology student (Graduating 2028) with experience building cloud-backed web applications using Python, Flask, and AWS (S3, EC2, IAM). Developed a full-stack file management system with role-based access control and contributed to a Digital Twin simulation project that placed 4th at TN-Impact Hackathon 2026. AWS AI-Powered Cloud Engineer certified and actively building projects on GitHub.

EXPERIENCE

AWS AI-Powered Cloud Engineer Virtual Internship

EduSkills Foundation

January 2026 - March 2026

- Completed AWS Educate curriculum covering core cloud services including EC2, S3, and IAM.
- Gained practical knowledge of cloud security concepts including bucket policies, IAM roles, and secure file operations.
- Applied cloud computing foundations through hands-on labs and assessments on the EduSkills platform.

PROJECT

Cloud File Management System

Self-initiated project • github.com/manodevi17/cloud-file-manager-flask • April 2026 - April 2026

- Built a full-stack file management web application using Python, Flask, Boto3, and Moto.
- Simulated AWS S3 cloud storage with IAM-inspired role-based access control (Admin and Viewer roles).
- Implemented secure file operations including upload, download, and delete with access restricted by role.

Digital Twin Model - TN-Impact Hackathon

TANCAM • github.com/manodevi17/DigitalTwin • February 2026 - February 2026

- Collaborated in a team to develop a virtual factory simulation that replicates real-world operations of small-scale factories.
- Modelled factory workflows digitally to enable scenario testing, eliminating costly real-world trial and error.
- Designed to improve operational efficiency and reduce production costs for small-scale manufacturing units.

EDUCATION

B.Tech Information Technology

SSM Institute of Engineering and Technology • Dindigul, Tamilnadu • 2028 • In Progress

CERTIFICATIONS

AWS AI-Powered Cloud Engineer – Virtual Internship Completion

EduSkills Foundation • 2026

Certified Blockchain Associate

Kerala Blockchain Academy • 2025

AWARDS & HONORS

4th place in TN - Impact Hackathon

TANCAM • 2026

- Achieved 4th place among 450+ competing teams at TN-Impact Hackathon 2026.

SKILLS

- Programming Languages: Python, C, Java
 - Web Technologies: HTML, CSS, JavaScript, Flask
 - Cloud & Libraries: AWS (S3, EC2, IAM), Boto3, Moto
 - Database: SQL/MySQL
 - Core Concepts: OOP, DBMS, Cloud Computing, Role-Based Access Control
 - Tools: Git, GitHub
-
